

- Organising an invites-only event?
- Require cost effective and accurate entry control and analysis?

We have the solution!

Designed to meet the specific demands of companies who need to control the entry points of invites-only events.

How It Works

We import your invite list into our systems and produce bar-coded invites or visitor badges.

We load the list of invitees on hand held bar code scanner devices.

Each entry control point representative receives a hand held device.

The visitor invite or badge is scanned at the entry point/s during the event.

Invitees are verified via a visitor list lookup on the scanner and false records and duplicates are identified on site.

Entrance information is downloaded from the hand held devices and summarised, backed up and emailed to you daily.

Cost Effective

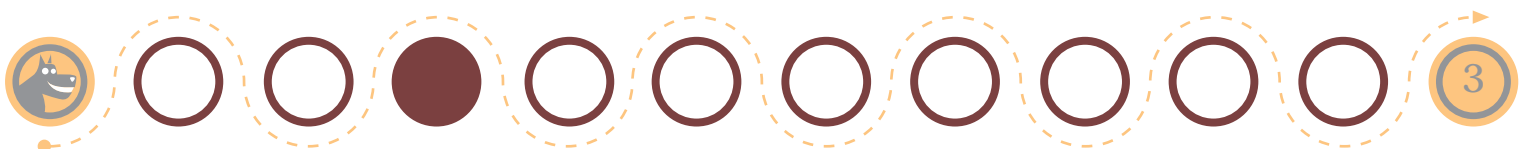

Simple

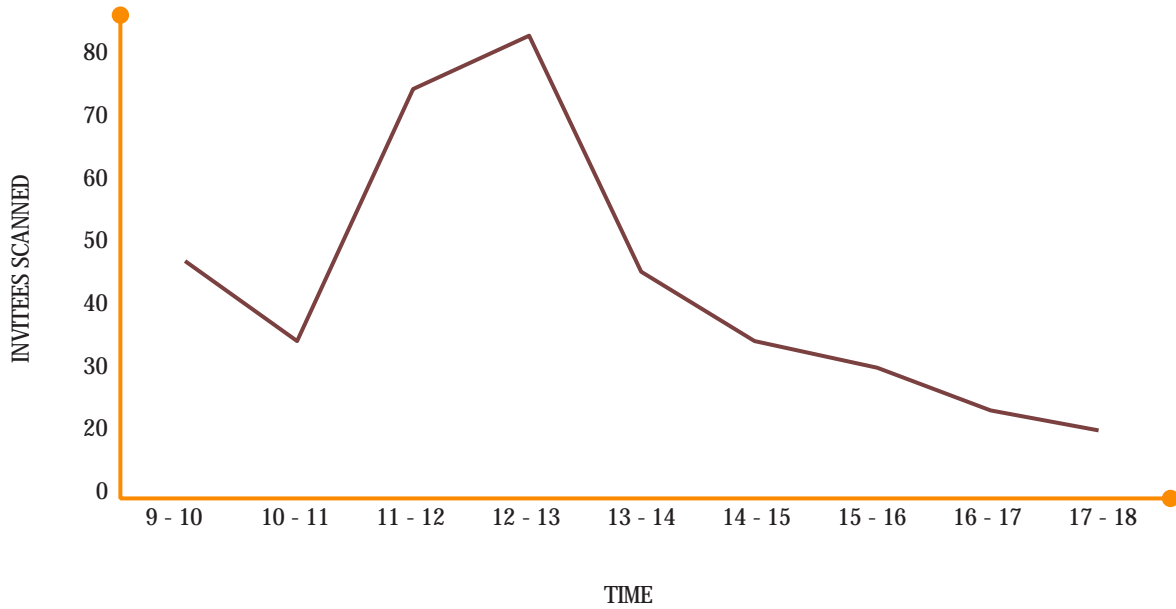

Accurate

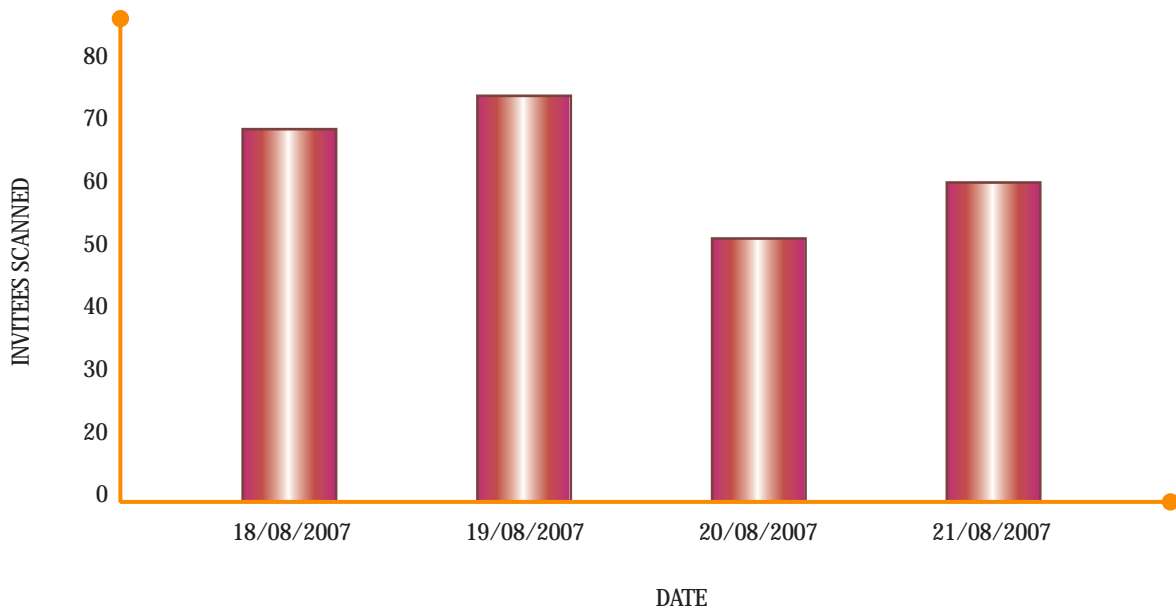

- Have a record of those who did, and did not attend the event
- Eliminate fraudulent passes: identity fakes and duplicates
- Be able to welcome visitor from information displayed on bar code scanner screen
- 'Classify' visitors and analyse entrance statistics according demographics
- Simple and cost effective
- Personalised to meet your needs

Busy Entrance Periods

Productive Event Days

In Conclusion

The control of entry to a VIP event is difficult to achieve without intrusive and expensive entry control mechanisms, that are normally designed for more permanent entry environments. Let Big Inja help you control the entry to your event in a cost effective manor and take it a step further by providing you with useful data and statistical analyses.

1. Top of Technology
2. Pure Passion
3. Undeniable Uniqueness
4. Absolute Integrity
5. Little Hlanya

These pillars form the foundations that Big Inja Technologies is built upon. A team of vibrant, professional, passionate and dedicated experts that strive to ensure that their clients experience the very best, personalised service. Shifting the focus of product development and delivery back to specific client requirements back to the core reasons they exist.

WOOF!
